

Product: POLICRYL 54

General characteristics: Acrylic polymer with high molecular weight

Chemical nature:

pH 10% solution:	4,0- 5,0
Active material:	40,0 ± 1%
Light fastness:	Excellent
Stability:	Stable with any mineral tanning agent.
Solubility in water:	Easily soluble
Charge:	Anionic
Appearance:	Yellowish viscous liquid
Fields of use:	Shoe upper articles in chrome leather.

Properties

POLICRYL 54 is an high molecular weight acrylic polymer stable with chrome and other mineral tanning agent.

POLICRYL 54 gives a tight and firm grain therefore is suitable for corrected grain articles.

POLICRYL 54 apply 20 minutes before chrome gives its best characteristic specially in the empty wet blue leather.
