

Product: POLICRYL AC

General characteristics: Compact acrylic polymer

Chemical nature:

pH in 10% solution:	3-4
Active material	25 ± 1%
Light fastness:	Good
Chrome stability	Good
Solubility in water:	Easily soluble
Charge:	Anionic
Appearance:	Dense colourless liquid
Fields of use:	Shoe upper articles .Vegetable and chrome leather, garment.

Properties

POLICRYL AC is acid polymer agent to improve the grain tightness in low PH.

POLICRYL AC thanks to its low PH find the best application 30 minutes before chrome retanning to obtain very tight grain and flat leather.

POLICRYL AC can be use also in neutralization or also after neutralization to get more fullness and roundness effect on the leather .
