

Product: POLYCRIL SM CONC

General characteristics: Stiren-maleic polymer

Chemical nature:

pH 10% solution:	7,5-8,5
Active material:	30,0 ± 1%
Light fastness:	Excellent
Stability:	No stable in acid media
Solubility in water:	Easily soluble
Charge:	Anionic
Appearance:	Slightly yellowish liquid

Fields of use: Shoe upper articles. Vegetable and chrome leather.

Properties

POLICRYL SM CONC is a stiren-maleic polymer suitable for chrome and vegetable leather.

POLICRYL SM CONC gives tight and smooth grain , we suggest the application 20 minutes before fatliquor combination or after fatliquor combination.

POLICRYL SM CONC is unstable to the acidity therefore we suggest to apply it at PH over 4.
