

Product: POLICRYL T 34

General characteristics: Medium-soft acrylic polymer free salt

Chemical nature:

pH in 10% solution:	6 – 7
Active material	30 ± 1%
Light fastness:	Good
Solubility in water:	Easily soluble
Charge:	Anionic
Appearance:	Dense colourless liquid
Fields of use:	Shoe upper articles .Vegetable and chrome leather, garment.

Properties

POLICRYL T 34 is a medium soft acrylic polymer to improve the elasticity and firmness of leather.

Thanks to its short chain can penetrate easily on the fibre with out showing hard and rough grain.

POLICRYL T 34 can be apply in neutralization float to obtain more compact leather , after neutralization in retanning float to obtain more roundness effect or after fatliquoring to obtain soft and firm grain.

POLICRYL T 34 show a uniform dyeing effect and it helps the penetration of dye and retanning material.

POLICRYL T 34 is also suitable for waterproof articles because completely free of sodium salt.
