

Product: POLIGUM 15

General characteristics: Rubber polymer

Chemical nature:

pH 10% solution:	6,0-7,0
Active material:	15,0 ± 1%
Light fastness:	Good
Solubility in water:	Easily soluble
Charge:	Anionic
Appearance:	Pink liquid
Fields of use:	Shoe upper articles. Vegetable and chrome leather. In sheepskin and goatskin.

Properties

POLIGUM 15 is a rubber polymer, it give a rubber touch to the leather.

POLIGUM 15 used after fatliquor combination gives its best effect to the leather. It show bone effect in section specially in chrome leather.

POLIGUM 15 applied in retanning stage to improve the softness and elasticity.
