

Product: POLIGUM FC

General characteristics: Short chain rubber polymer

Chemical nature:

pH in 10% solution:	6-7
Active material	15%
Light fastness:	Good
Solubility in water:	Easily soluble
Charge:	Anionic
Appearance:	Pink liquid
Fields of use:	Shoe upper articles .Vegetable and chrome leather. In sheepskin goatskin and cow leather.

Properties

POLIGUM FC is a rubber polymer , it give a rubber touch to the leather.

POLIGUM FC used after fatliquor combination gives its best effect to the leather. It show natural and uniform effect specially in milling articles.

POLIGUM FC applied in retanning stage to improve the softness elasticity and fine grain.
