Light fastness:	Good
Solubility in water:	Soluble, better in hot water
Charge:	Anionic
Appearance:	White paste at temperature less than 25°C; became liquid at temperature more than 25°C
Fields of use:	Where more touch and fatliquor dispersion is requested

Properties

ECOPON S is a particular kind of soap that improves fatliquor distribution in the leather.

ECOPON S , due to its particular composition, gives a good final touch to every articles; we suggest to use a percentage of 1,0-2,0% on the weight of the leather mixed with the fatliquors.

ECOPON S used on suede, avoid oily effect on the surface, preserving the writing effect.
