

Product:	IDEA COMPLEX
-----------------	---------------------

General characteristics:	Blend of organic acid
---------------------------------	------------------------------

Chemical nature:

pH in 10% solution:	1 – 2
Active material:	96% - 98%
Tear resistance:	Excellent
Solubility in water:	Easily soluble
Charge:	Anionic
Appearance:	Ivory granular powder

Fields of use:	Deliming, Pickle, Tanning and retaning chrome, Wet blue
-----------------------	--

Properties:

IDEA COMPLEX is a blend of organic acid with deliming effect and complexing of chrome.

IDEA COMPLEX increase the elasticity of fibre therefore increase the tear resistance.

IDEA COMPLEX during rewetting of wet blue has a complexing and bleaching effect of chrome so that the dyeing will be more uniform and brilliant.

IDEA COMPLEX can be applied at the beginning of deliming to obtain more compact fibre thanks to its buffering power.

IDEA COMPLEX applied at the beginning of pickle improve tear resistance, penetration and exhaustion of chrome.
