

Product: DECAL EXTRA

General characteristics: Blend of buffered acids and salts

Chemical nature:

pH 10% solution: 2,0-3,0
Active material: 100%
Solubility in water: Easily soluble
Charge: Anionic
Appearance: Slightly yellow granular powder

Fields of use: Powder deliming agent

Properties:

DECAL EXTRA is used on pelts to eliminate calcium salts present in the leather.

DECAL EXTRA has been formulated to complex calcium ions carrying out a mild action in a complete and even way.

When deliming is over, the skin hasn't undergone any damaging swelling and the final pH is always below 8,5.

DECAL EXTRA contributes to skin cleaning, clearing out the pores of the salty deposits and of the piliferous bulbs detached but not pulled away.

The deterging action will allow perfect bating and even tannage, reducing the possibility of stains on wet blue.
