

Product: ECOPON 80

General characteristics: Product based on ethoxylate alcohols

Chemical nature:

pH 10% solution:	6,5 – 7,5
Active material:	80,0 ± 1%
Solubility in water:	Easily soluble
Charge:	Anionic/ no ionic
Appearance:	Limpid medium viscosity

Fields of use: Soaking, bathing rewetting agent

Properties

ECOPON 80 has a strong degreasing and emulsify effect.
ECOPON 80 from 0,3% to 1% cab be applied in soaking to increase the wetting back, in bathing as degreasing of the natural fat. In wt blue wetting back thank to its emulsify and cleaner effect.
