

Product: ECOPON EA

General characteristics: Product based on ethoxylate alcohols

Chemical nature:

pH in 10% solution:	6,5-7,5
Active material:	65,0 ± 1%
Solubility in water:	Easily soluble
Charge:	no ionic
Appearance:	Limpid medium viscosity

Fields of use: Soaking, bathing wetting agent

Properties

ECOPON EA has a strong degreasing and emulsify effect.
ECOPON EA from 0,3% to 1% cab be applied in soaking to increase the wetting back, in bathing as degreasing of the natural fat. In wt blue wetting back thank to its emulsify and cleaner effect.
ECOPON EA may be used also to formulate fatliquors or surfactant based products.
