

Product: LIME WR 30

General characteristics: Amines based product

Chemical nature:

pH 10% solution: 9,0-10,0
Active material: 30,0 ± 1%
Charge: Anionic
Appearance: Transparent yellowish liquid
Solubility in water: Easily soluble

Fields of use: Liming process

Properties:

LIME WR 30 is an auxiliary for ecological liming, free of inorganic sulphides .

Thanks to its chemical composition, **LIME WR 30**, ensures a good anti-wrinkle effect , then it greatly improves cleaning of the grain, helping the detachment of the hair complete with bulb, so contributing to the reduction of the sulphide used in liming.

USE:

From 1% to 1,5% as anti-wrinkle
From 1% to 2% as partial substitute of sulphide
