

**Product:** LIME WRME

**General characteristics:** Thioglicolyc acid based product

**Chemical nature:**

**pH 10% solution:** 9,0-10,0  
**Active material:** 30,0 ± 1%  
**Charge:** Anionic  
**Appearance:** Reddish liquid

**Fields of use:** Liming auxiliary

**Properties:**

**LIME WRME** is a liming auxiliary, without inorganic sulphide and volatile amines.

**LIME WRME** thanks to its chemical composition, guarantees an excellent anti-wrinkle effect, as well as a valuable improving of the grain cleaning.

**LIME WRME** helps the detachment of the hair from the bulb and contributes to the reduction of the amount of sulphide used in the liming process.

**USE:**

From 0,7% to 1,0% if used as anti-wrinkling.

From 1,0% to 1,2% if used as a partial substitute of sulphide amount.
