

Product: SOATEN SF

General characteristics: Sodium dioctyl sulphosuccinate

Chemical nature:

pH 10% solution:	6,5-7,5
Active material:	20,0 ± 1%
Compatibility:	Anionic and non ionic
Biodegradability:	Over 90%
Solubility in water:	Easily soluble
Charge:	Anionic
Appearance:	Colourless clear liquid

Fields of use: Wetting back for soaking
and wet blue stage.

Properties:

SOATEN SF mainly is used as strong wetting back agent in soaking stage , it increase the penetration of water in the fibre rapidly and uniform system also in dry raw hides.

SOATEN SF assures the elimination of sebaceous substances.

USE :

From 0,3 % to 0,5% in soaking stage on fresh salted weight.

From 0,3 % to 0,5% in wet blue stage on shaved weight.
