

Product: LUBROTAN B 45

General characteristics: Softening polymer

Chemical nature:

pH in 10% solution:	6-7
Active material:	54 + 1%
Chrome stability:	Good
Electrolyte stability:	Good
Light fastness:	Good
Solubility in water:	Easily soluble
Charge:	Anionic

Appearance: Amber liquid

Fields of use: Gument and any articles where softness and light specific weight is required

Properties:

LUBROTAN B 45 is a softening polymer to be used in any stage of the formulation. Together chrome in retanning it give a deep softness with uniform absorption and exhaustion.

LUBROTAN B 45 in combination with synthetic , natural tanning agent and acrylic resin help the penetration and lubrication of the grain , giving a natural effect.

LUBROTAN B 45 in combination of fatliquors increase the softness end elasticity of the grain specially in garment articles.

APPLICATION :

2% LUBROTAN B 45 in chrome retanning

2% LUBROTAN B 45 in retanning with syntetic , natural tanning agentand acrylic resin .

3% LUBROTAN B 45 in combination with fatliquors .
